## Needle-free Injection: Acceptance & Preference Study #2 – November 2014

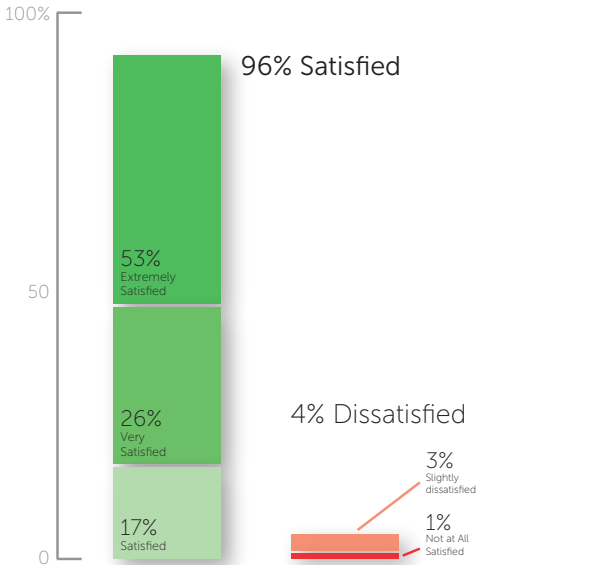

Influenza vaccinations were given to employees of the **State of New Jersey Department of Public Health** over a period of two weeks in November 2014. All subjects between the ages of 18-64 years of age were vaccinated by Needle-free injector and were asked to fill out a survey of the experience. **664 subjects responded to survey questions.**

Subjects were overwhelmingly accepting of the PharmaJet *Stratis*<sup>®</sup> Needle-free injector for delivery of their seasonal flu shot. **Over 95% indicated they would choose PharmaJet needle-free injection for their next flu shot.**

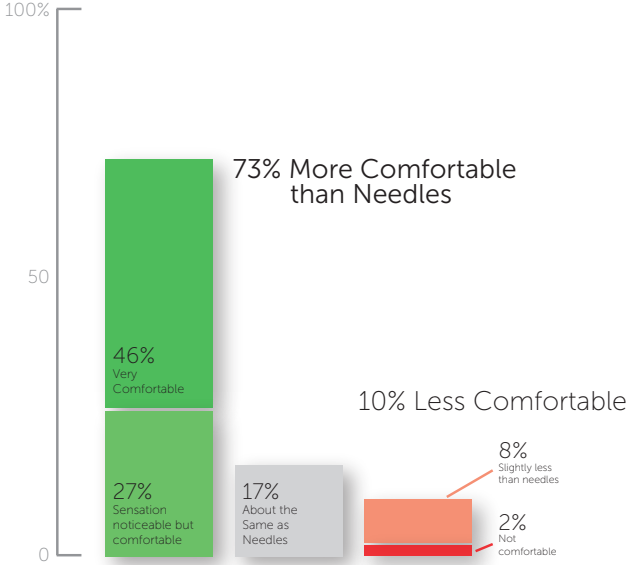

*PharmaJet, Inc. (2014) "61-10191 Post Market Surveillance – New Jersey Public Health Flu Campaign", internal company report, November 2014.*

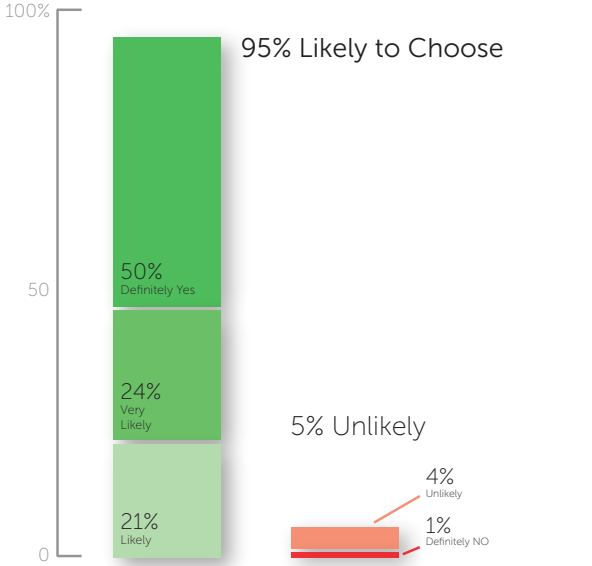

How satisfied were you with today's Needle-Free Flu Shot?

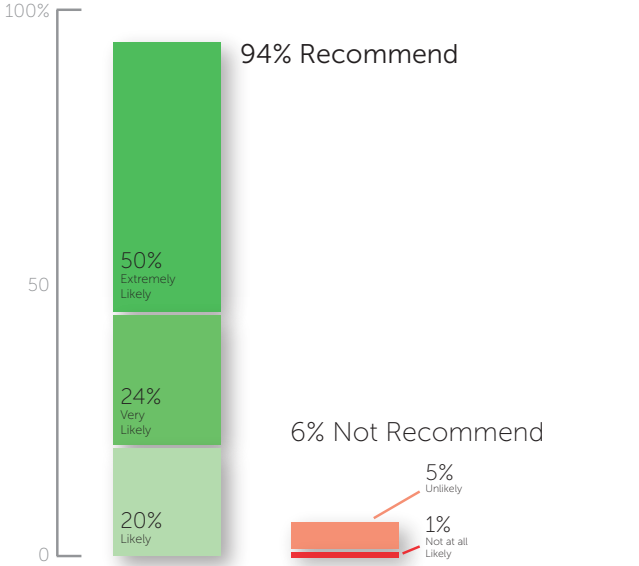

Considering all factors, compare how comfortable today's Needle-Free Injection was versus your previous needle injections.

For next year's flu vaccination, will you choose to receive your flu shot with a Needle-Free Injection?

How likely are you to recommend a Needle-Free Flu Shot to family and friends?
